Imagine a young girl who loved numbers and stars. Her name is Amel. She was born in 1985 in a small town near Batna. When she was a child, she spent her evenings looking at the sky with her father's old telescope. At school, she was very good at mathematics and physics.

After the Baccalaureate, she studied physics at the university of Constantine. Then she won a scholarship and continued her studies abroad. Today, she works in a research laboratory and studies the planets. Last year, she visited her old middle school and told the pupils: "Work hard and believe in your dreams!"
