فرض الفصل الأول

فرض في مادة: اللغة الإنجليزية المدة: ساعة

Many teenagers find it difficult to save money. They spend their pocket money on snacks, phone credit and clothes. Financial advisors say that if young people learned to make a budget, they would avoid many problems later. First, they should write down how much money they receive and spend each week. Then, they must separate needs from wants. A careful teenager who saves a little every week can buy something useful, like a bicycle or books, without asking his parents.
